

## **The Regenerative Clinic Certified UK Training Centre**

**The Regenerative Clinic is a world leading UK based clinic providing regenerative treatments in orthopedics, aesthetics and gynaecology and has now been officially recognised as the official UK training center.**

In association with Lipogems

# We are the official UK certified training centre for the indication, technique and application of the Lipogems treatments as well as other regenerative treatments.

The Regenerative Clinic is a world leading UK based clinic providing regenerative treatments in orthopedics, aesthetics and gynecology and has now been officially recognised as the official UK training center for Lipogems.

Our team of leading surgeons and specialists invite you to join us at our state of the art facilities in London to take part in an exclusive Lipogems training program where you will have the chance to experience first hand how the patients treatment is delivered from initial consultation to their experience in theatre and post-op care.

In theatre our consultant plastic surgeons will be able to brief you on the technique and allow you access

to theatre to view a number of cases. Participants in the training program will also gain exclusive access to our significant patient registry, outcome data and will have access to our monthly MDT.

Our clinic also offers a number of alternative regenerative treatments and if interested we can also offer participants the opportunity to capitalize on our clinician's expertise in other regenerative medicines such as Platelet Rich Plasma Therapy (PRP).

PRP takes advantage of the bloods natural healing properties to repair the damaged cartilage, tendons, ligaments and muscles with the aim of reducing pain and improving joint functionality.
